Changelog

Updates · https://fluentboards.com/docs/changelog/

2.2.1 (Date: October 13, 2026)

- Fix: Upload directory warning issue
- Fix: Cloud attachment downloads failing on some sites
- Fix: Search briefly showing empty results while typing
- Fix: CSV import upload error handling
- Fix: Recurring task and reminder scheduling fixes
- Fix: Minor stability and permission fixes

2.2.0 (Date: October 12, 2026)

- **New:** Browse, preview, and create boards from built-in templates
- **New:** OpenRouter support for AI writing assistance
- **New:** Create MCP connection keys from your account, with admin-managed access
- **New:** Import Fluent Boards exports without Pro
- **New:** Filter recurring tasks and task templates
- **New:** Drag and drop boards into folders
- **Improvement:** Update your profile name and photo from your account
- **Improvement:** Redesigned notification emails with light and dark mode support
- **Improvement:** Easier member access management across multiple boards

- **Improvement:** Preserve more task data when duplicating boards, importing, and using templates
- **Improvement:** Richer comment formatting, slash commands, and easier description copying
- **Improvement:** Clearer recurring schedules, links to generated tasks, and custom-field activity history
- **Improvement:** Faster board lists, task activity feeds, and bulk stage moves
- **Improvement:** Simpler AI setup, updated model choices, and better translations
- **Fixed:** Assignment notifications, comment email links, and incorrect archive emails when restoring tasks
- **Fixed:** Bulk task moves now apply stage defaults and trigger notifications and webhooks
- **Fixed:** Task and board deletion now cleans up related data and local or cloud attachments
- **Fixed:** Search and filters now work together, and failed status updates preserve the previous status
- **Fixed:** Recurring tasks retain custom fields and correctly update task counts and creation webhooks
- **Fixed:** Time-log dates, custom date fields, timesheet access, and CSV exports
- **Fixed:** Webhook event selection, task completion events, and missing-data handling
- **Fixed:** FluentCRM task assignments, template data, and contact-board associations
- **Fixed:** Task navigation, upload protection, and board permission checks
