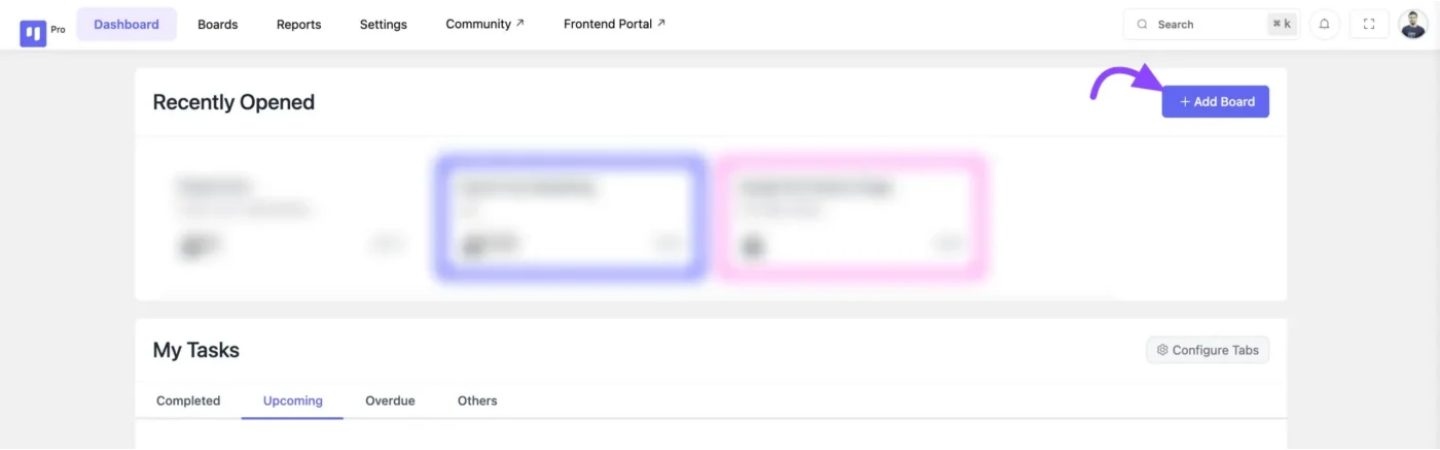
Creating a New Board

Board Management · https://fluentboards.com/docs/how-to-create-a-new-board/

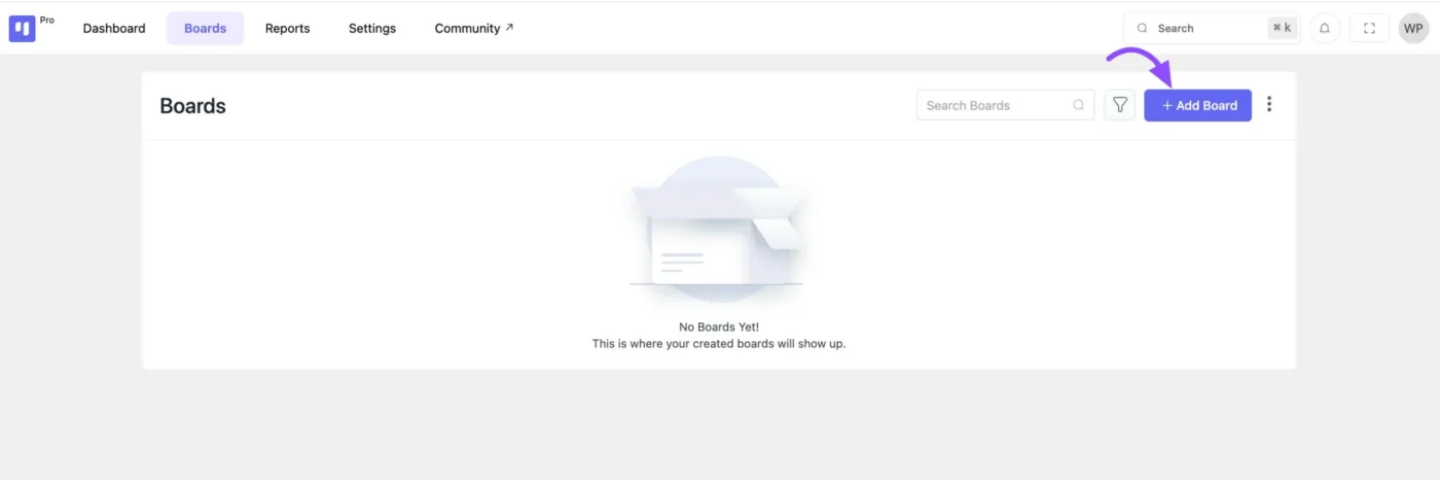
FluentBoards is a handy plugin that makes managing your projects in WordPress a breeze. Now, let's see how easy it is to create a new board to manage your projects.

Creating New Board

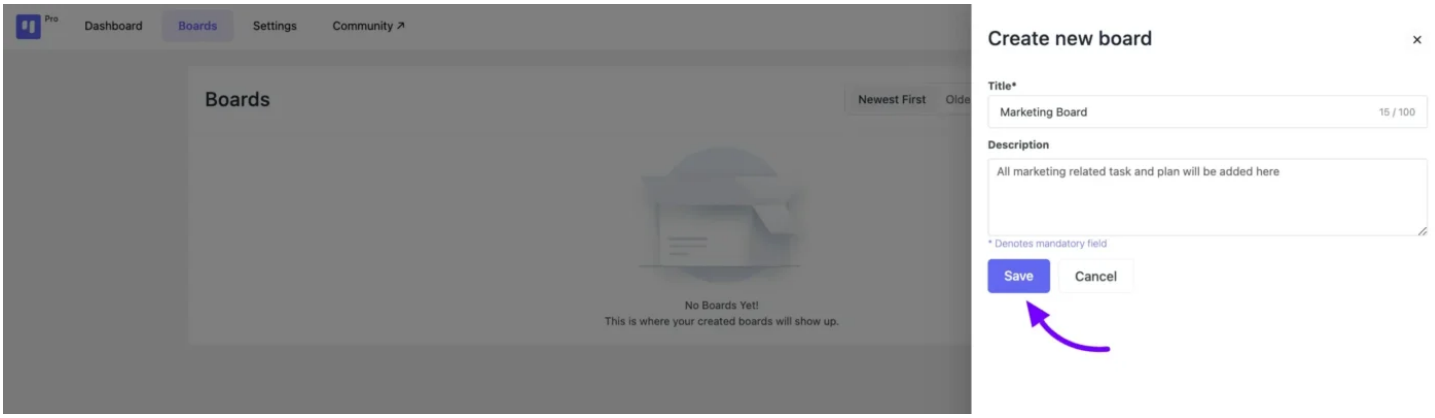
Go to the Fluent Board from your WordPress and you will find an **+ Add Board** button in the FluentBoards **Dashboard**. Click on the button.



You'll also find the **+Add Board** option conveniently located within your **Boards** section.



Next, a pop-up will appear from the right side of the board interface. Here, provide a title and description for your board, then click the **Save** button.



And just like that, your board is ready to go! You can now begin adding stages and tasks to your newly created board.
