Import Boards from Asana

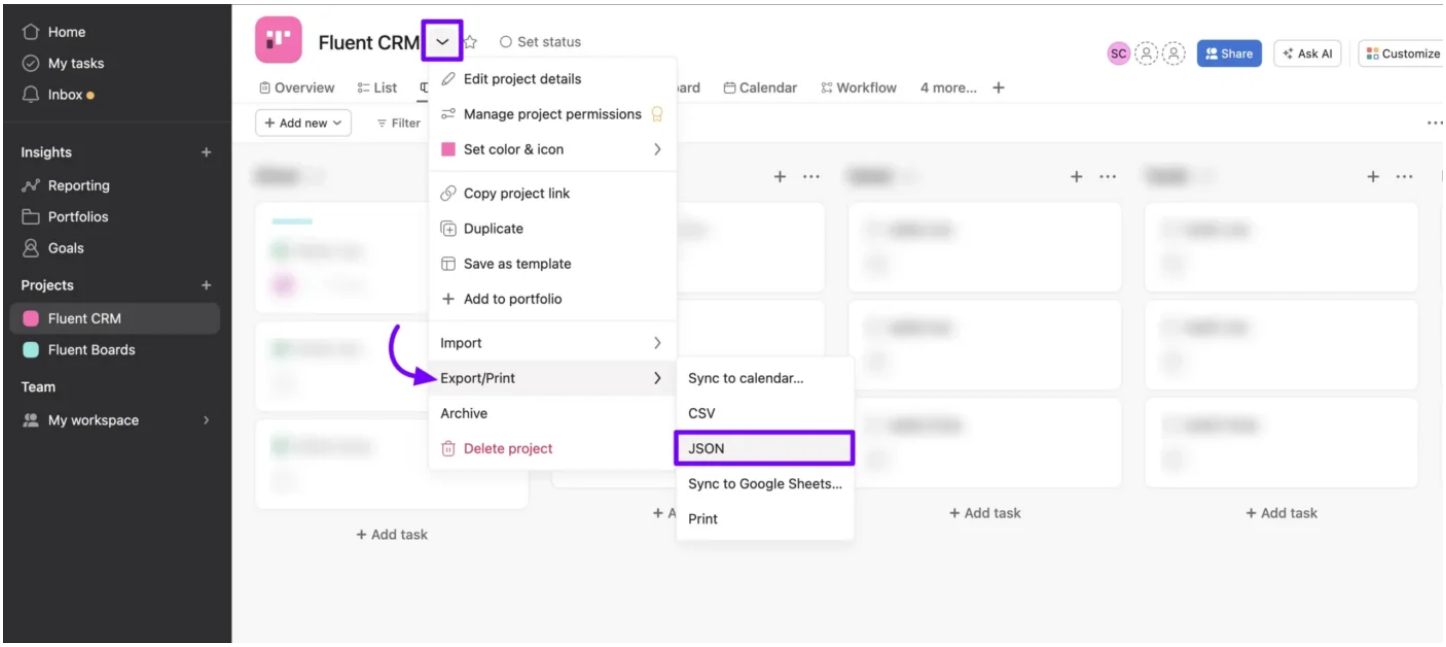

Import/Export · https://fluentboards.com/docs/import-boards-from-asana/

With the Import feature of FluentBoards, you can Import Boards from **Asana**. It’s a very simple process we will show you the process in this article.

Export Board from Asana

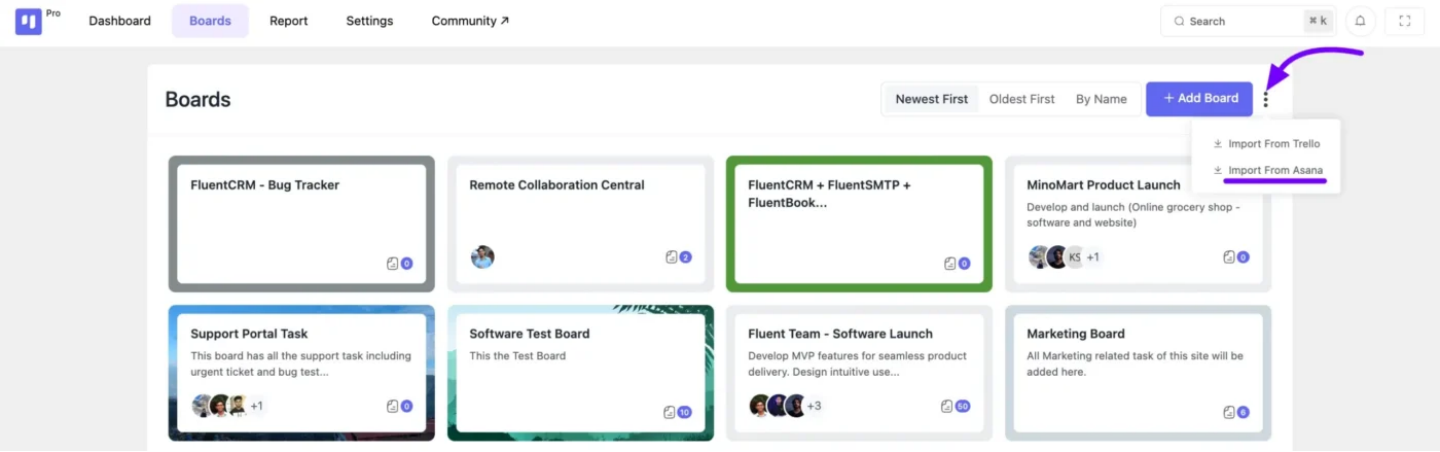

Go to your Asana account and open the Boards you want to migrate in your FluentBoards. Now click on the **Dropdown** button beside the Board Name.

Select the **Export/Print** from the dropdown list and click on the **JSON** button. Your Asana Board will be now downloaded in JSON format.

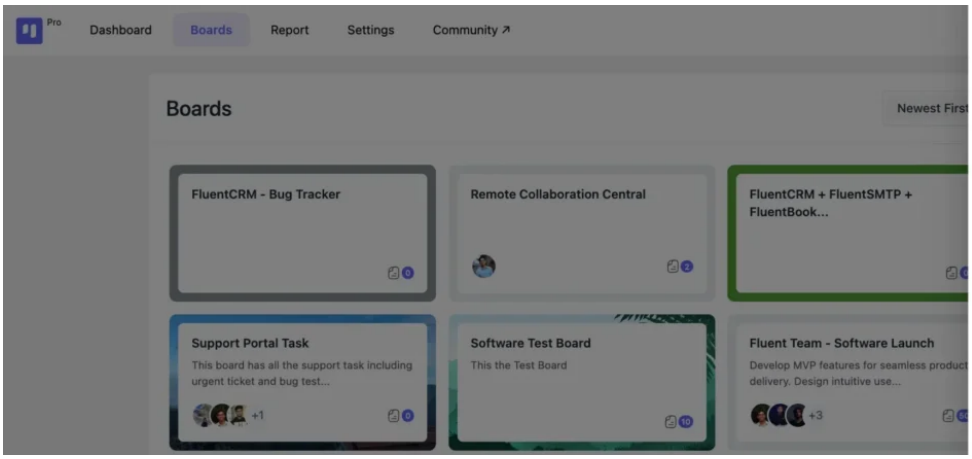

Import Asana Board

Now navigate to your FluentBoards and go to the **Boards** from the Navbar. On the top right corner of the board's section you will see a **three-dot** button click on it. Select the **Import From Asana** button here.

You will see the file upload option click on it and select the JSON file you have downloaded from Asana. Then click on the **Upload and Start Importing** button.

Now you will see your imported board in your FluentBoards.
